## Ordinance and Regulations related to the Integrated B.Sc.B.Ed. Degree

01. The Objective and the Learning outcomes of the Integrated B.Sc.B.Ed. Degree are-

### Objectives:

- To promote capabilities for inculcating national values and goals as mentioned in the constitution of India.
- To act as agents of modernization and social change.
- To promote social cohesion, international understanding and protection of human rights and right of the child.
- To acquire competencies and skills needed for teacher.
- To use competencies and skills needed for becoming an effective teacher.
- To become competent and committed teacher.
- To be sensitive about emerging issues such as environment, population, general equality, legal literacy etc.
- To inculcate logical, rational thinking and scientific temper among the students.
- To develop critical awareness about the social issues & realities among the students.
- To use managerial organizational and information & technological skills.

### Learning outcomes:

1. Competence to teach effectively two school subjects at the Elementary & secondary levels.
2. Ability to translate objectives of secondary education in terms of specific Programmes and activities in relation to the curriculum.
3. Ability to understand children's needs, motives, growth pattern and the process of learning to stimulate learning and creative thinking to foster growth and development.
4. Ability to use-
5. Individualized instruction
6. Dynamic methods in large classes.

*P. J. Khas*

Dy. Registrar(Academic-I)  
University of Rajasthan  
Jaipur

7. Ability to examine pupil's progress and effectiveness of their own teaching through the use of proper evaluation techniques.
8. Equipment for diagnosing pupil progress and effectiveness of their own teachings through the use of proper evaluation techniques.
9. Readiness to spot talented and gifted children and capacity to meet their needs.
10. Ability to organize various school programmes, activities for pupil.
11. Developing guidance point of view in educational, personal and vocational matters.
12. Ability to assess the all round development of pupils and to maintain a cumulative record.
13. Developing certain practical skill such as:
  - a. Black board work
  - b. Preparing improvised apparatus
  - c. Preparing teaching aids and ICT.
14. Interest and competence in the development of the teaching profession and education. Readiness to participate in activities of professional organizations.

#### Integrated Programme of B.Sc.B.Ed. Degree Shall Consist of

- i) First Year B.Sc.B.Ed.
- ii) Second Year B.Sc.B.Ed.
- iii) Third Year B.Sc.B.Ed.
- iv) Final Year B.Sc.B.Ed.

Duration of the Course - Four Years

Examination after each session in theory papers

Scheme of Examination against each subject separately.

#### Compulsory Papers:

Year	Paper
I <sup>st</sup> Year	Gen. English
II <sup>nd</sup> Year	Gen. Hindi
III <sup>rd</sup> Year	Computer Application (ICT)
IV <sup>th</sup> Year	Environmental Education

\*ELIGIBILITY CRITERION ON PASSING MARKS BUT MARKS SHALL NOT BE INCLUDED IN DIVISION.

**Group - A: - Subject Specialisation :**

Year	Paper
I <sup>st</sup> Year	Instructional System & Educational
II <sup>nd</sup> Year	Peace Education
III <sup>rd</sup> Year	Guidance and Counselling in School
IV <sup>th</sup> Year	Physical Education & Yoga

Group-B: Content of Science Subject: - A Student has to opt PCB & PCM Group select any three optional subject (papers) from group B which two must be the school teaching subjects.

Chemistry	I, II & III
Botany	I, II & III
Zoology	I, II & III
Physica	I, II & III
Mathematics	I, II & III

Group C: Pedagogy of School Subject 08 A/B: Pedagogy of a School Subject III<sup>rd</sup> Year and IV<sup>th</sup> Year (candidate shall be required to offer any two papers from the following, for part-III & part-IV).

Pedagogy of Chemistry
Pedagogy of Biology
Pedagogy of Physics
Pedagogy of Mathematics
Pedagogy of General Science

- In all the subjects the student has to study a minimum of 12 papers in 1<sup>st</sup> year, 12 Paper in III<sup>rd</sup> Year and 7 Paper in IV<sup>th</sup> Year ( Total 43Papers).
- Each theory paper will carry 100 marks and content base paper 05, 06, 07 (G-B) will carry 150 marks. (With practical part). Distribution of marks in mathematics is according to their marking scheme in page no.7.

**Scheme of Instruction for B.Sc. B.Ed Courses**

Details of course and scheme of study, titles of the papers, duration etc. for B.Sc.B.Ed Course are provided in Tables given below :-

## PART II

### Practical Work

#### Objectives:

To develop the ability and self-confidence of pupil teachers:

1. To be conscious of sense of values and need for their inculcation in children through all available means including one's own personal life.
2. Possess a high sense of professional responsibility.
3. Develop resourcefulness, so as to make the best use of the situation available.
4. Appreciate and respect each child's individuality and treat him as independent and integrated personality.
5. Arouse the curiosity and interest of the pupils and secure their active participation in the educative process.
6. Develop in the pupil's capacity for thinking and working independently and guide the pupils to that end.
7. Organize and manage the class for teaching learning.
8. Appreciate the dynamic nature of the class situation and teaching techniques.
9. Define objectives of particular lessons and plan for their achievements.
10. Organize the prescribed subject-matter in relation to the needs, interest and abilities of the pupils.
11. Use the appropriate teaching methods and techniques.
12. Prepare and use appropriate teaching aids, use of the black board and other apparatus and material properly.
13. Convey ideas in clear and concise language and in a logical manner for effective learning.
14. Undertake action research.
15. Give proper opportunity to gifted pupils and take proper care of the back-ward pupils.
16. Co-relate knowledge of the subject being taught with other subjects and with real life situations as and when possible.
17. Prepare and use assignments.
18. Evaluate pupil's progress.
19. Plan and organize co-curricular activities and participate in them.

  
 Dy. Registrar (Academic-I)  
 University of Rajasthan  
 Jaipur

20. Co-operates with school teachers and administrators and learns to maintain school records and registers.

**Practical skill to teach the two school subjects offered under Theory papers VIII A/B and the following:**

1. Observation of lesson delivered by experienced teachers and staff of the college.
2. Planning units and lessons.
3. Discussion of lesson plans, unit plans and lessons given (including criticism lesson)
4. Organization and participation in co-curricular activities.
5. Setting follows up assignment.
6. Evaluation in terms of educational objectives use of teachers made tests & administration of standardized tests.
7. Black-board work.
8. Practical work connected with school subjects.
9. Preparation and use of audio visual aids related to methods of teaching.
10. Experimental and laboratory work in chemistry, botany, zoology, physics, and mathematics subjects of experimental and practical nature.
11. Study of the organization of work and activities in the school.
12. Observation and assistance in the health education programme.
13. Observation and assistance in the guidance programme.
14. Maintenance of cumulative records.
15. Techniques of teaching in large classes.

O. 322 A candidate has to deliver at least 40 lessons (20 Lessons of one teaching subject in 3<sup>rd</sup> year & 20 Lessons of other teaching subject in 4<sup>th</sup> year) in a recognized school under the supervision of the staff of the college shall be eligible for admission to the examination for the degree of B.Sc.B.Ed.

Notes :-

- i. Teaching subject means a subject offered by the candidate at his/her running B.Sc B.Ed. course either as a compulsory subject or as an optional subject provided that the candidate studied it for at least two years. Thus the qualifying subjects like General English, General Hindi, Education and

  
 Dy. Registrar(Academic-I)  
 University of Rajasthan  
 Jaipur

Environment Education. Prescribed for running B.Sc.B.Ed. course of the University or a subject dropped by candidates at the part I stage of the degree course shall not be treated as teaching subjects.

- ii. Only such candidate shall be allowed to offer General Science for the B.Sc B.Ed Examination who had studied Chemistry and any one subject of life science i.e. Biology, Botany or Zoology.
- iii. To maintain same sequence of papers (G.A. - IVth, G.B. 05/06/07 papers (1st, IIrd & IIIrd year) and § a/b IIIrd year and IVth year) in the four years B.Sc.B.Ed Integrated course, paper no IIIrd in B.Sc.B.Ed IIIrd year and paper no VIIIth in B.Sc.B.Ed IVth year were skipped.

- Q.323** No candidate shall be allowed to appear in the Integrated B.Sc/B.Ed examination I,II,III & IV Year unless he/she has attended (80% for all course work & practicum, and 90% for school internship)
- Q.324** The examination for Integrated B.Sc.B.Ed. for Four Year shall be in two parts- part 1<sup>st</sup> comprising theory papers & part 2 practice of teaching in accordance with the scheme of examination laid down from time to time.
- Q.325** Candidates who fail in Integrated B.Sc.B.Ed examination in part 1 or part 2 the theory of education may present themselves for re-examination there in at a subsequent examination without attending a further course at an affiliated training college.

Provided that a candidate who fails in any one of the theory papers and secures at least 48% marks in the aggregate of the remaining theory papers may be allowed to reappear in the examination in the immediately following year in the paper in which he/she fails only. He/she shall be declared to have passed if he secures minimum passing marks prescribed for the paper in which he appeared and shall be deemed to have secured minimum passing marks only prescribed for the paper in which he failed for the purpose of determining his division in accordance with the scheme of examination. The candidate shall have to repeat the whole examination in subsequent year in case he fails to clear the paper in which he failed.

- Q.326** Candidates who fail in the Integrated B.Sc.B.Ed. examination part 1 and part 2 only in the practice of teaching may appear in the practical examination in the subsequent year provided that they keep regular terms for four calendar months per year and give at-least 40 lessons(20 in part 1 & 20 in part 2) supervised lessons.

  
 Dy. Registrar (Academic-I)  
 University of Rajasthan  
 Jaipur

O.326 A: A candidate who complete a regular course of study in accordance with the provision laid down in the ordinance, at an affiliated teacher's training college for four academic year but for good reasons fails to appear at the Integrated B.Sc.B.Ed. examination may be admitted to a subsequent examination as an Ex-student as defined in O.325 or O.326 Above.

O.326 B: No candidate shall be permitted to appear as an Ex-student at more than one subsequent examination. The Integrated B.Sc.B.Ed programme shall be of duration of four academic years, which can be completed in a maximum of five years from the date of admission to the Integrated B.Sc.B.Ed. Degree.

Regulation 42 :-

Scheme of Integrated B.Sc.-B.Ed Four Year Examination

The Integrated B.Sc.B.Ed. (Four years) will consist of the following components;

Part I- Main theory papers of B.Sc.-B.Ed. I, In Integrated B.Sc.B.Ed I Paper nos. are 02, 03 & 04 in each session are of three hours carrying 100 marks (80 for theory + 20 for sessional) each. Compulsory paper\* 01 of 100 marks and optional Paper 05, 06, 07 (G-1). In each session are three hours carrying 150 marks (100 marks theory + 50 marks practical). Distribution of marks in mathematics is according to their marking scheme in page no.7.

Part II- Practice Teaching - Micro Teaching, Internship, Practice Teaching of 20 weeks (10 at B.Sc.B.Ed Year III & 10 at B.Sc.B.Ed Year IV) Block Teaching, Criticism and Final Lesson in III & IV Year per teaching subject.

Organization evaluation of practice teaching:

1. Every candidate will teach at-least 40 lessons (20 in III Year & 20 in IV Year) during practice teaching session. At least ten lessons in each subject should be supervised.
2. 40 (20+20) lessons as desired in the syllabus should be completed as full period class room lesson. Micro teaching lesson to be used in addition to those 40 lessons for developing certain teaching skills.
3. A minimum of ten lessons in each subject will be supervised evaluated by the subject specialist or a team of specialists of the subjects.

Dy. Registrar(Academic-I)   
 University of Rajasthan   
 Jaipur

4. By and large, the evaluation of the performance in the practical teaching will be based on the last ten lessons in the subject when the student has acquired some competence and skills of teaching.
5. The internal assessment in practice of teaching will be finalized by the principal with the help of members of the teaching staff and the same will be communicated to the university before the commencement of the practical each year.
6. At Integrated B.Sc.B.Ed III Year each candidate should be prepared to teach one lesson at the final practical examination. At the Integrated B.Sc.B.Ed IV Year exam candidate should be prepared to teach two lessons (one in each subject). The external examiners may select at-least 10% of the candidates to deliver two lessons in Integrated B.Sc.B.Ed IV Year.
7. There will be a board of Examiners for the external examination for each college which will examine each candidate in at-least one lesson and a minimum of 15% in two lessons (one in each of the two subjects).
8. The board of Examination will consist of:
  - (a) The principal of the college concerned.
  - (b) A principal or a senior and experienced member of the teaching staff of another training college, affiliated to University of Rajasthan.
  - (c) An external examiner from outside the University of Rajasthan or a senior member of the teaching staff of an affiliated training college.
  - (d) The board as far as possible will represent Social sciences, Language and science.
9. Approximately 50 lessons will be examined by the board each day.

#### Working out the result and awarding the division:

- (1) A candidate in order to be declared successful at the Integrated B.Sc.B.Ed. I, II, III & IV Year Examination shall be required to pass separately in Part I (Theory) and Part II (Practice of Teaching).
- (2) For a passing in Part I (Theory) a candidate shall be required to obtain at-least (a) 30 percent marks in each theory paper and sessionals (24 marks out of 80 and 6 marks out of 20); (b) 30% marks in each theory paper and

  
 Dy. Registrar (Academic-I)  
 University of Rajasthan  
 Jaipur

sessional (11 marks out of 35 & 4 marks out of 15) (c) 36 percent marks in the aggregate of all the theory papers.

- (3) For passing in Part-II (school internship Practice of Teaching) a candidate shall be required to obtain separately at-least-
- ❖ 40 percent marks in the external examination.
  - ❖ 40 percent marks in internal assessment.
- (4) The successful candidates at Integrated B.Sc.B.Ed Four Year Examination obtaining total marks will be classified in three divisions and shall be assigned separately in theory and school internship Practice of teaching as follows:

Division	Theory	Practice of Teaching
I	60%	60%
II	48%	48%
Pass	36%	40%

The practical work record shall be properly maintained by the college and may be made available for work satisfaction of external examiner in school internship (practice teaching), those are expected to submit a report regarding this separately.

# Elementary Computer Applications

Maximum Marks: 100 (Main University Examinations)

Theory : Max Marks -60

Practical : Max Marks -40

Each Candidate has to pass in Theory and Practical Examinations separately.

Question paper for Elementary Computer Applications, (Compulsory paper - common for B.A./B.Sc./B.Com. Part-I) be so set that it has 120 multiple choice questions (Bilingual) of ½ marks each. The question paper will be of duration of 2 hours. The examinees will have to give their answers on OMR Sheet only to be provided by the University whose evaluation will be done based on OMR Scanning Technology. Further the practical examination for this paper will be of 40 marks and its duration will be of 2 hours.

## Unit - I

Introduction to information technology : Evolution and generation of computers, type of computers, micro, mini, mainframe and super computer. Architecture of a computer system: CPU, ALU, Memory (Ram, Rom families) cache memory, input/output devices, pointing devices.

Concept of Operating system, need types of operating systems, batch, single user, multi - processing, distributed and timeshared operating systems, introduction of Unix, Linux, Windows, Windows NT. Programming languages Low level and high level languages, generation of languages, 3 GL and 4 GL languages. Graphical User Interfaces.

## Unit - II

Word Processing tool : Introduction, Creating, Saving, Copy, Move and Delete. Checking Spelling and Grammar, Page Layout, interface, toolbars, ruler, menus keyboard shortcut, editing, Text Formatting, insert headers and footers, Bullets and Numbering, Find and Replace etc. Insert Table and Picture, Mail Merge.

Power Point : Creating and viewing a presentation, managing slide shows navigating through a presentation using hyperlinks, advanced navigation with action setting and action buttons, Organizing formats with Master Slides applying and modifying designs adding graphics, multimedia and special effects.

## Unit - III

Electronic Spreadsheet : Worksheet types of create and open a worksheet. Entering data text numbers and formula in a worksheet inserting and deleting cells cell formatting, inserting rows and columns in a worksheet formatting worksheets. Using various formula and inbuilt function. Update worksheet using special like spell check and auto correct setup the page

...projects for printing. Format the data in the worksheet globally or selectively.  
...enhance worksheets using charts, multiple worksheets concepts

### Unit - IV

The Internet: History and Functions of the Internet, Working with Internet, Web Browsers, World Wide Web, Uniform Resource Locator and Domain Names, Uses of Internet, Search for Information, Email, Chatting, Instant messenger services, News, Group, Teleconferencing, Video Conferencing, E-Commerce and M-Commerce.  
Manage an E-mail Account, E-mail Address, configure E-mail Account, log to an E-mail, Receive E-mail, Sending mails, sending files as attachments and Address Book, Downloading Files, online form filling, E-Services - E-Banking and E-Learning.

### Unit - V

Social, Ethical and Legal Matters - Effects on the way we Work, Socialize, Operate in other areas.  
Cyber crime, Prevention of crime, Cyber law: Indian IT Act, Intellectual property, Software piracy, Copyright and Patent, Software licensing; Proprietary software, Free and Open source software.  
Network Security: Risk assessment and security measures; Assets and types (data, applications, system and network); Security threats and attacks (passive, active); types and effects (e.g. Identity theft, denial of services, computer virus etc.); Security issues and security measures (Firewalls, encryption/decryption), Prevention.

Question Paper pattern for Main University Practical Examination

Max Marks: 40

#### Practical

The practical exercises will be designed to help in the understanding of concepts of computer and its utilization in the areas outlined in the theory syllabus. The emphasis should be on practical knowledge rather than theoretical concepts only.

The practical examination scheme should be as follows -

- Three Practical Exercise (including Attendance & Record performance) 30 marks
  - o Operating system
  - o MS Word
  - o MS Excel
  - o MS Power Point
  - o Internet
- Viva-voce 10 marks

Dr. ROHINI  
Principal  
11/11/2023

**B.Sc. B.Ed-02 PART - II**

**Language across the curriculum**

Marks-100

Q.1) Give will enable the pupil teacher to-

(i) Understand the linguistic background of students as the direct or second language users.  
(ii) Be sensitive to the language diversity that exists in the class room.

(iii) Understand the nature of the major differences and develop strategies for using oral language in classroom.

(iv) Understand the nature of reading and writing in specific contexts areas.

(v) Understand interplay of language and society.

(vi) Understand functions of language.

(vii) Understand language and speech disorder and their remedial measures etc.

Q.2) Define the nature, scope, role, importance, functions of language, language background, language and religion, language and class, role of literature in language

Q.3) Define language (mother tongue) and second language/second language. 2) Formal and informal language (3) Oral and written language - meaning, principles, objectives, relation, differences

Q.4) Write in language, theoretical aspects of oral aptitude, development of oral communication in pupil teacher, classroom discourse, discussion as a tool of learning, role of the class room, developing reading skill through text book, problems and solutions, oral pronunciation.

*[Signature]*  
By Registrar (Acad.)  
University of Jammu  
JAMMU

1. Language skills - (LSWR-Listening, speaking, writing, reading.) Meaning, concepts, importance, co-relation, methods and techniques,

2. Language laboratory- Need, Injustices, Advantages, Use in teacher's training.

- 3. Listening skill - Pronunciation, Intonation, Stress, Pitch, Rhythm and Oral aptitude.
- 4. Speaking skill - Pronunciation, Intonation, Stress, Pitch, Rhythm and Oral aptitude
- 5. Writing skill - Aspects of writing-simples. Sounds, Meanings, Punctuation marks, Word, Sentence, Expression in writing, mechanics of writing, understanding and capacity to make correct logical summarizing and expanding thoughts and experiences, composition - story letter poetry, incidents, report articles etc.
- 6. Reading skill - Consonants, Vowels, Words, Sentences, Recognition, Understanding, Silent reading, Imitation Reading, and Loud reading.

Unit - 5

1. Language Text Book - Criteria of selection and critical analysis of language text book, children's literature and teachers characteristics of good material. Understanding the relationship between curriculum, syllabus and the selection of materials. Development of activities and tasks, continuous evaluation, learning objectives, theories, from rote learning to non rote learning, teacher as a guide.

Test and Assignments

(20 MARKS)

1. Case Test (10 marks)
  2. Any One (10 marks)
- Discuss with students and find out the different languages they speak, prepare a plan to use multilingualism as a teaching strategy.
  - Identify speech defects of primary level students and make remedial strategy.
  - Organizing an activity based game to motivate students for creative questioning.
  - Clear and critical reading/discussion in small groups.

Dy. Registrar (Acad.)  
University of Rajasthan  
JAIPUR

- Conduct a survey in secondary school to study academic achievement in overall or in specific subject of diverse linguistic students.

### GUIDANCE AND COUNSELING

#### OBJECTIVES: -

MARKS-100

The course will enable the student teachers to -

- Understand the concept, need and meaning of guidance.
- Get acquainted with the principles, issues, problems and procedure of guidance.
- Develop understanding about the role of school in guidance
- Understand the various areas, tools and techniques in guidance.
- Understand the concept, need and meaning of counseling.
- Get acquainted with the principles and process of counseling.
- Understand the tools and techniques in counseling.

*P. J. Var*

Dy. Registrar(Academic-I)

**UNIT - 1. GUIDANCE IN SCHOOL**

- Concept, Need and Meaning of Guidance.
- Principles of Guidance.
- Procedure of Guidance ( steps)
- Issues and problems of Guidance.
- Role of school in Guidance.

**UNIT 2. AREAS, TOOLS AND TECHNIQUES IN GUIDANCE.**

- Personal, Educational and vocational Guidance.
- Tools :- Records of students
- Cumulative Record
- Rating scale
- Psychological tests.
- Questionnaire and Inventories
- Techniques in Guidance (a) Observation, (b) interview, (c) Sociometry

**UNIT 3. COUNSELLING IN SCHOOL**

- Concept, Need and Meaning of counseling
- Principles of Counseling.
- counseling Process and Role.
- Directive, non-directive and eclectic counseling.
- Qualities and role of a school counselor.

**UNIT 4. TOOLS AND TECHNIQUES IN COUNSELLING**

- Individual counseling and Group counseling
- Lectures, discussions and Dramatics as techniques in counselling.
- Importance of follow-up in counselling.
- Counseling for the children with special needs
- Counseling for parents.

**UNIT 5 Guidance and Counseling for Special Needs Population****Guidance of children with special needs**

- problems and needs
- guidance of the gifted and creative students
- guidance of under achiever.

**PEDAGOGY OF SCHOOL SUBJECT****PAPER:-VIII A / B****CHEMISTRY TEACHING**

Marks-100

**Objectives -**

To enable student teacher to:

1. Understand the Nature, Place, Values and Objectives of teaching chemistry at secondary/senior secondary level.
2. Understand correlation with other subjects
3. Evaluate critically the existing syllabus of chemistry
4. Develop understanding of various objectives of teaching Chemistry in Secondary Schools.
5. Understand and adopt proper methods of teaching various topics of Chemistry.
6. Appreciate the usefulness of various co-curricular activities for fostering interest of pupils in Chemistry.
7. Get acquainted with various methods of evaluation of the progress of pupils in Chemistry.
8. Prepare and use different types of instructional material for teaching Chemistry.
9. Understand the difficulties faced in teaching and learning Chemistry and suggest remedial measures.
10. Evaluate critically the existing syllabus of Chemistry prescribed for Secondary/Senior Secondary level in the State of Rajasthan.
11. Provide training in scientific method and develop scientific temper among their students.

**Unit - I: The Nature of Science**

- Definition of Science, Scientific Method, Scientific Literacy with suitable examples from Chemistry.
- Nature of science with special reference to chemistry
- Instructional Objectives, General and Specific Objectives of Teaching Chemistry
- Correlation of chemistry with other subjects.

Dy. Registrar(Academic-I)  
University of Rajasthan  
Jaipur  
B\*

**Unit - II: Curriculum and Planning**

- Chemistry Curriculum, Place of Chemistry in School Curriculum
- Principles of Curriculum Construction, Difference between Curriculum and Syllabus,
- Co-curricular activities, factors influencing curriculum of chemistry.
- Modern trends in Chemistry Curriculum CBA, Chemical- Education Material Study, Nuffed- O & A level.
- Critical appraisal of Chemistry syllabus at Secondary/Senior Secondary level prescribed by Board of Secondary Education, Rajasthan.
- Planning- Daily lesson plan, unit plan & yearly plan.

**Unit - III: Methods of Teaching Chemistry**

- Micro Teaching, Skills of teaching Lesson Planning,
- Methods of Teaching Chemistry- Lecture Method, Demonstration Method, Discussion Method, Problem Solving Method, Project Method, Inductive-Deductive Method, Co-operative method, Constructivism method.
- Teaching Models-Concept Attainment Model, Inquiry Training Model
- Qualities of chemistry teacher.

**UNIT-IV Instructional Support System**

- Teaching Aids in Chemistry Audio Aids, A-V Aids, Educational Broadcasts, Television and Teleconferencing, Charts, Models, Low Cost Teaching Aids, Improvised Apparatus.
- Chemistry Lab: Layout Plans, Equipments, Furniture, Maintenance of records, repair, care and improvisation of apparatus, safety measures in lab.
- Role of State & National Level Institutions & Laboratories like DST, NCL, Fertilizer, Pesticide & Chemical Companies like Hindustan Zinc Ltd.
- Characteristics of a good text book and evaluation of a Text Book

**Unit - V: Evaluation of Chemistry**

- Difference between Measurement, Assessment and Evaluation,
- Characteristics of good Measurement, Diagnostic Test and Remedial Teaching.

*Poj / Tar*

Dy. Registrar(Academic-I)  
University of Rajasthan  
Jaipur

- Criterion Referenced Testing and Norm Referenced Testing, Different types of items, Essay type, Short types objective type
- Development and Standardization of Achievement Test in Chemistry.

#### Assignments :-

1. Class Test 10 marks
2. Any one of the following :- 10 marks
  - Planning and Conducting Experiments.
  - Preparation of models and charts.
  - Preparation of Chemistry Projects.
  - Criticals analysis of chemistry textbooks.
  - Preparation of design, blue print for teacher made test.
  - Development of self-instructional material on any one topic of Chemistry
  - Life sketch & contribution of any one prominent Indian Chemist.
  - Preparation of scrap book containing original science (Scientific cartoon) Stories/article
  - Life sketch & contribution of any one prominent Indian Chemist.
  - Conducting & reporting two experiments useful at secondary/senior secondary level (other than those in syllabus)
  - A critical study of any one senior secondary Lab of chemistry.
  - Preparation of 10 frames of Linear or Branching type programmes on any topic of Chemistry.

## PEDAGOGY OF SCHOOL SUBJECT

### PAPER:-VIII A / B

## BIOLOGY TEACHING

Marks:40

Objectives:

To enable student Teacher to

1. Understand the Nature, Place Values and objectives of teaching Biology at Senior Secondary level.
2. Establish its correlation with other subjects
3. Evaluate critically the existing syllabus of Biology prescribed for Secondary/Senior Secondary level in the state of Rajasthan
4. Develop yearly plan, unit plan and lesson plan for Senior Secondary classes.
5. Provide training in Scientific method and develop Scientific temper among their students.

*Raj / Tan*

Dy. Registrar(Academic-I)  
University of Rajasthan  
Jaipur

6. Use various methods and approaches of teaching Biology
7. Acquire the ability to develop instructional support system.
8. Plan and organize chemistry practical work at the Laboratory.
9. Organise Co-curricular activities and utilize community resources promoting Science learning.
10. Use most appropriate method to assess the progress and achievement of the pupil & thus prepare appropriate test for this purpose (both theoretical & practical)

#### UNIT-I Nature, Scope and Objectives

- Nature of science with special reference to Biology.
- Main discoveries and development in Biology.
- Place & values of teaching Biology at secondary/senior secondary level.
- Correlation of Biology with other subjects.
- Objectives of teaching Biology at secondary/senior secondary level.

#### UNIT-II Curriculum and Planning

- Principles of Biology curriculum at secondary/senior secondary level.
- Modern trends in Biology Curriculum : B.S.C.S..
- Critical appraisal of Biology syllabus at secondary/senior secondary level prescribed by Board of Secondary Education, Rajasthan.
- Planning- Daily lesson plan, unit plan & yearly plan.
- Qualities & responsibilities of Biology teacher. Teacher's role in training students in scientific method and in developing creativity and scientific temper among their students.

#### UNIT-III Methods and approaches

- Lecture method, Demonstration method, Lab based methods, Inductive & deductive method, problem solving, Heuristic, Constructivism, & Project method.
- Inquiry approach, programmed instruction, Group discussion, self study, Team teaching, computer assisted learning, seminars and workshops.

Dy. Registrar(Academic-I)  
 University of Rajasthan  
 Jaipur

**UNIT-IV Instructional Support System**

- Multi sensory aids: Charts, models, specimen, bulletin - boards, flannel Board, Transparencies slides, projector, OHP, Computer, T.V., and Radio etc.
- Co-curricular Activities: Organization of science club, science fair, trips and use of community resources.
- Biology Lab: Organization of Biology Laboratory, Arrangement of Apparatus, Care & Maintenance of equipment & specimen, organization of practical work in Biology.
- Role of state & National Level Instructions & Laboratories Research centers in Botany, Zoology & Agriculture.
- Characteristics of a good text book and Evaluation of a Text Book.

**UNIT-V Evaluation in Biology**

- Evaluation: Concept, Types and purposes.
- Type of test items and their construction.
- Preparation of Blue Print & Achievement Test.
- Evaluation of practical work in Biology.

**Seasonal Work :(20 Marks)**

(1) Class Test 10 Marks

(2) Any one of the following-- 10 Marks

- Life sketch & contribution of any one prominent Indian Biologist.
- Preparation of Herbarium (set - p bank)
- Prepare any one of the following related to environment education.  
(i) Poster (miniature), (ii) Article, (iii) Story, (iv) Play
- Description of any two teaching models.
- Prepare a Radio or T.V. script.
- Make a list of local resources useful in teaching Biology and prepared lesson plan using some of them.
- A case study of any one senior secondary lab of Biology.
- Preparation of 10 frames of Linear or Branching type programmes on any topic of Biology.
- Construction and administration of Diagnostic test on any one unit of Biology.

  
 Dy. Registrar (Academic-I)  
 University of Rajasthan  
 Jaipur

**PEDAGOGY OF SCHOOL SUBJECT****PAPER-VIII A / B****Physics Teaching**

MARKS: 1.

**Objectives:-**

The student teachers will be able to:

1. Understand the nature of Science and Physics.
2. Appreciate the contribution of Indian and Foreign scientists in the development of Physics.
3. Develop the skill of planning teaching learning activities.
4. Develop competencies in (a) Selection and use of teaching methods, approaches and devices. (b) Selection, preparation and use of cost effective teaching aids.

  
 Dy. Registrar(Academic-I)  
 University of Rajasthan  
 Jaipur  
 302002

- (c) Incubation of scientific attitude and science related values. (d) Plan, manage physics laboratory and organize physics practical work.
5. Develop skill of critical appraisal of Physics text book.
  6. Select and effectively make use of teaching aids.
  7. Organize co-curricular activities related to physics.
  8. Plan and critically appraise Physics curriculum at senior secondary level.
  9. Prepare, use and analyze achievement tests for evaluation of learning outcomes of Physics.

### Course content

#### Unit - I - Foundations of teaching physics

- Nature of Science and Physics, Major milestones in the development of physics, Contributions of Eminent Indian and foreign Physicists: C.V.Raman, Vikram Sarabhai, Homi Jehangir Bhabha, Subramanyan, D.S. Kothari, Chadershekar, Saryender Nath Bose, Newton, Archimedes, Alexander Graham Bell, Madam Curie, Albert Einstein.
- Relationship of science and society, impact of physics on modern Indian society with reference to issues related with Environment, Globalization, Industrialization, and Information Technology.
- Aims and objectives of teaching physics at senior secondary level, Correlation of physics with other school subjects.

#### Unit - II - Planning for Instruction and Role of Teacher

- Specific Objectives of Teaching Physics in Behavioural Terms, Content Analysis and Concept Mapping
- Developing Yearly Plan, Unit Plan and Daily Lesson Plans.
- Teacher's role in training students in scientific method, developing scientific attitude, critical thinking and creativity.
- Qualities, responsibilities and professional ethics of physics teacher.
- Criteria for selection of physics text book, critical appraisal of Physics Text Book

#### Unit - III - Approaches and Methods of Teaching Physics

- Concept approach - Process approach - teaching science as a process.

  
 Dy. Registrar(Academic-I)  
 University of Rajasthan  
 Jaipur

- scientific method, problem solving method,
- Cooperative learning approach,
- Activity based approach – investigatory approach,
- project method, laboratory method ,
- Demonstration-cum-discussion method ,
- Constructivist approach

#### Unit IV- Instructional support system

- Multi sensory aids: Significance and Psychological Principles of using Teaching Aids, use of charts, models, overhead projectors, computers, internet, and improvised apparatus.
- Use of Community resources in teaching of physics.
- Planning, equipping and maintaining Physics Laboratory; planning and guiding practical work
- Selecting and guiding Projects in Physics.
- Planning and organization of Science Clubs, Science fairs and Field trips

#### Unit -V Physics curriculum and Evaluation of Physics Learning

- Principles of developing curriculum of Physics,
- Evaluation of physics learning : formative, summative, continuous and comprehensive evaluation, types of test items and their construction, preparation of blue print and achievement test, item analysis,
- Diagnostic testing and remedial teaching in physics.. Evaluation of Practical Work

#### Sessional Work --

- |                              |         |
|------------------------------|---------|
| 1. Class Test                | 10MARKS |
| 2. Any one of the following: | 10MARKS |
- Case study of any one Senior Secondary School Laboratory of Physics.
  - Preparation of a diagnostic test of physics on any one unit.
  - Planning activities for teaching a unit of physics using local resources
  - Conducting and reporting a practical class in Physics Laboratory

**PEDAGOGY OF SCHOOL SUBJECT****PAPER:-VIII A / B****MATHEMATICS TEACHING**

Marks – 100

**Objectives:**

On completion of the course the future teacher educators will be able:

1. To enable prospective mathematics teachers towards the processes in which mathematics learning takes place in children's mind.
2. To enable the nature, characteristics and structure of mathematics and its correlation with other areas.
3. To enable the processes in mathematics and their importance.
4. To enable the content categories in mathematics and illustrate with examples.
5. To enable understanding of the Goals, Aims and Objectives of teaching mathematics at secondary school level.
6. To enable awareness about the objectives of teaching mathematics at secondary school level as envisaged by NCF 2005 and KCF 2012.
7. To enable understanding and skill in preparing lesson episodes based on Five E model; different approaches, methods, models and techniques of teaching mathematics.
8. To enable understanding about collaborative learning and cooperative learning strategies.
9. To enable the prospective mathematics teachers as facilitators for effective learning of mathematics.
10. To enable prospective mathematics teachers with ICT enabled skills for facilitating learning of mathematics.
11. To enable skill in assessing mathematics learning.
12. To enable prospective mathematics teachers as reflective practitioners.

**UNIT I Nature and Structure of Mathematics**

- a) Meaning and characteristics of mathematics– Science and Mathematics – Development of Mathematics: empirical, intuitive and logical
- b) History of Mathematics education : Ancient period to 21st century

  
 Dy. Registrar(Academic-I)  
 University of Rajasthan  
 Jaipur

- c) Contributions of eminent Mathematicians( Western & Indian) 4 each)
- d) Branches of Mathematics: Arithmetic, Algebra, Geometry, Trigonometry
- e) Undefined terms - Axioms - Postulates - Theorems - Proofs and verification in mathematics-Types of theorems: Existence and Uniqueness theorems - Types of proofs: Direct, indirect by contradiction, by exhaustion, by mathematical induction.
- f) Euclidean geometry and its criticisms - emergence of non Euclidean geometry.

#### UNIT- II Objectives and Approaches of Teaching Mathematics

- a) Aims and Objectives of Teaching Mathematics: At primary, Secondary and Higher secondary levels - Goals of mathematics education □ Mathematical skills: Calculations, Geometrical, and interpreting graphs - Mathematical abilities □ Problem solving ability.
- b) Approaches to teaching Mathematics: Behaviorist approach, constructivist approach,
- c) Process oriented approach, Competency based approach, Realistic mathematics education.

#### UNIT-III METHODS AND MODEL OF TEACHING MATHEMATICS:

- a) Methods of teaching mathematics: Lecture, Inductive, Deductive, Analytic, Synthetic, Heuristic, Project, Problem solving, and Laboratory methods, Co-operative, constructivism method.
- b) Techniques of Teaching Mathematics: Questioning, Brain storming, Role playing, Simulation.
- c) Non formal techniques of learning Mathematics
- d) Models of Teaching: Concept attainment model, inquiry training model, Inductive thinking model.

#### UNIT - IV Pedagogical content knowledge of mathematics

- a) Concept of pedagogic content knowledge (PCK)
- b) Pedagogic content knowledge analysis for selected units of 8th, 9th, 10th and 11th std-Content analysis, Listing pre-requisites, instructional objectives and task analysis

  
 Dy. Registrar(Academic-I)  
 University of Rajasthan  
 Jaipur

- c) Analysing and selecting suitable teaching methods, strategies, techniques, models; learning activities, Year plan (Programme of work), Unit plan and lesson plan in mathematics – their need and importance
- d) Analysing and selecting suitable evaluation strategies
- e) Identifying the misconceptions and appropriate remedial strategies

#### UNIT-V Technology in mathematics education

- a) Technology integration strategies for mathematics, web based lessons, web quest, cyber guides, multimedia presentation, Tele computing projects, online discussions
- b) E-content development concept, formats, steps for preparation.
- c) A survey of software used in mathematics teaching and learning.

#### SESSIONAL:

1. Class Tests 10 MARKS
2. Any one 10 MARKS
  - b) Group puzzles activity
  - c) Preparation of teaching aids
  - d) Demonstration of teaching aids
  - e) Collection of newspaper cuttings related to learning of a unit in mathematics.
  - f) Preparing a script for radio lesson or T.V. lesson in mathematics.
  - g) Visiting a mathematics lab in a school and presenting a report.

MARKS:-100

#### OBJECTIVES:-

The Pupil- teacher will be able to-

1. Familiarize with nature of General Science.
2. Formulate instructional objectives in behavioral terms.
3. Critically evaluate the existing science curriculum at secondary level.
4. Understand the basic concepts of General Science.
5. Acquaint themselves with laboratory plan, purchase and maintenance of equipment and material.
6. Explain the concept of evaluation and construct blue print of question paper.

#### Unit - I Teaching of General Science

- Meaning, nature, aims and objectives of General science
- Importance of General science in Teaching
- Correlation - concept, importance and types.

*Raj Kher*

Dy. Registrar(Academic-I)  
University of Rajasthan  
Jaipur

- Maxims of teaching in General science

### Unit - 2 Planning in General- Science teaching

- Curriculum - concept, methods of curriculum construction, Difference between Curriculum and Syllabus.
- Place of General science in school curriculum
- Critical appraisal of General Science syllabus at secondary/senior secondary level
- Science teacher - Qualities, Competencies
- Analysis of textbook.

### Unit - 3 Methods & Techniques of teaching in General Science

- Methods -Scientific Method, Demonstration, Laboratory, Heuristic, Project, Co-operative Learning, Constructivism, Inductive-deductive.
- Techniques:- Team teaching, Simulation, Task analysis, Cognitive psychology based technique, Technology based technique
- Year plan, Unit plan, Lesson plan - General, IT based,

### Unit- 4 Teaching Aids and Models of teaching

- Teaching Aids (Non-projective - chart, picture, model, Projective - Film projector, OHP, LCD, DLP,
- Science laboratory, Science club, Science Exhibition, Field trip
- Laboratory Equipment and Material- selection, purchase, maintenance and safety measures.
- Models of teaching:- Concept Attainment Model, Inquiry training model.

### Unit - 5 Pedagogical analysis & Evaluation in General Science

- Concept Approaches & Importance for pedagogical analysis,
- Core elements and values, Content cum methodology approach, IT based approach
- Importance of evaluation in General Science, Evaluation according to areas - Cognitive, Psychomotor & Affective, Domain
- Use of tools and technique of evaluation:- Achievement test, Diagnostic test, Remedial teaching, Online Evaluation

## CHEMISTRY

	Duration (hrs)	Max. Marks	Min. Pass Marks
Paper I	3	33	
Paper-II	3	33	16
Paper-III	3	34	
Practical	5	50	18

Note: Ten (10) questions are to be set taking two (02) questions from each unit. Candidates have to answer any 7 questions selecting at least one question from each unit.

### CH-391 Paper-I : Inorganic Chemistry (2 hrs or 3 periods/week)

#### Unit-I

##### Hard and Soft Acids and Bases (HSAB):

Classification of acids and bases as hard and soft. Pearson's HSAB concept, acid-base strength and hardness and softness. Synergism, theoretical basis of hardness and softness, electronegativity and hardness and softness.

#### Unit-II

##### Metal-ligand bonding in Transition Metal complexes:

Limitations of valence bond theory, an elementary idea of crystal-field theory, crystal-field splitting in octahedral, tetrahedral and square planar complexes, factors affecting the crystal-field parameters.

##### Magnetic properties of Transition Metal Complexes:

Types of magnetic behaviour, methods of determining magnetic susceptibility, spin-only formula, L-S coupling, correlation of  $\mu_{\text{obs}}$  and  $\mu_{\text{calc}}$  values, orbital contribution to magnetic moments, application of magnetic moment data for 3d metal complexes.

#### Unit-III

##### Electronic spectra of Transition Metal Complexes:

Types of electronic transitions, selection rules for d-d transitions, spectroscopic ground states, spectrochemical series, Orgel energy level diagram for  $d^1$  and  $d^9$  states, discussion of the electronic spectra of  $[\text{Cu}(\text{H}_2\text{O})_6]^{2+}$  complex ion.

##### Thermodynamic and Kinetic Aspects of Metal Complexes:

A brief outline of thermodynamic stability of metal complexes and factors affecting the stability, substitution reactions of square planar complexes.

#### Unit-IV

##### Organometallic Chemistry:

Definition, nomenclature and classification of organometallic compounds. Preparation,

*Rj/Tas*  
By Registrar (Acad.)  
University of Rajasthan

properties, bonding and applications of alkyls and aryls of Li, Al, Hg, Sn and Ti, a brief account of  $\pi$ -allylic complexes and homogeneous hydrogenation, mono-nuclear carbonyls and the nature of bonding in metal carbonyls.

#### Unit-V

##### Bioinorganic Chemistry:

Essential and trace elements to Biological processes, metalloporphyrins with special reference to haemoglobin and myoglobin. Biological role of alkali and alkaline earth metal ions with special reference to  $Ca^{2+}$ . Nitrogen fixation.

##### Inorganic Polymers:

Silicones and phosphazenes as examples of inorganic polymers, nature of bonding in triphosphazenes.

### CH-302 Paper-II: Organic Chemistry

(3 hrs or 3 periods/week)

#### Unit-I

##### Nuclear Magnetic Resonance (NMR) Spectroscopy:

Proton magnetic resonance (1H-NMR) spectroscopy, nuclear shielding and deshielding, chemical shift and molecular structure, spin-spin splitting and coupling constants, areas of signals. Interpretation of NMR spectra of simple organic molecules such as ethyl bromide, ethanol, acetaldehyde, 1,1,2-tribromoethane, ethyl acetate, toluene and acetophenone. Problems pertaining to the structure elucidation of simple organic compounds using NMR data.

Organic Synthesis via Enolates: Acidity of  $\alpha$ -hydrogens in reactive methylene compounds, alkylation of diethyl malonate and ethyl acetoacetate. Claisen condensation, Keto-enol tautomerism in ethyl acetoacetate. Synthetic applications of ethyl acetoacetate and malonic ester.

#### Unit-II

##### Heterocyclic Compounds

Introduction. Molecular orbital diagram and aromatic characteristics of pyrrole, furan, thiophene and pyridine. Methods of synthesis and chemical reactions with special emphasis on the mechanism of electrophilic substitution. Mechanisms of nucleophilic substitution reactions in pyridine derivatives. Comparison of basicity of pyridine, piperidine and pyrrole.

Introduction to condensed five- and six-membered heterocycles. Preparation and reactions of indole, quinoline and isoquinoline with special reference to Fisher-indole synthesis, Skraup synthesis and Bischler-Napierowski synthesis. Mechanism of electrophilic substitution reactions of indole, quinoline and isoquinoline.

#### Unit-III

##### Carbohydrates

Classification and nomenclature, Monosaccharides, mechanism of osazone formation. Epimers, anomers and mutarotation. Interconversion of glucose and fructose, chain lengthening and chain

P.S. Iyer  
Director (Acad.)  
University of Rajasthan  
Jaipur  
JAN

shortening of aldoses: Erythra and threo-diastereomers. Conversion of glucose into mannose. Configuration of monosaccharides. Determination of ring size of monosaccharides. Formation of glycosides, ethers and esters. Cyclic structure of D(+)-glucose and fructose. Structures of ribose and deoxyribose.

Nomenclature and structure of disaccharides (maltose, sucrose and lactose) and polysaccharides (starch and cellulose); Glycosidic linkage.

#### Unit-IV

Amino Acids, Peptides, Proteins and Nucleic Acids

Classification, structure and stereochemistry of amino acids. Acid-base behaviour, isoelectric point and electrophoresis. Preparation and reactions of  $\alpha$ -amino acids.

Structure and nomenclature of peptides and proteins. Classification of proteins. Peptide structure determination, end-group analysis, selective hydrolysis of peptides. Classical peptide synthesis. Solid-phase peptide synthesis.

Nucleic acids - Introduction, constituents of nucleic acids - nucleosides and nucleotides.

#### Unit-V

Organosulphur Compounds : Nomenclature, structural features, methods of formation and chemical reactions of thiols, sulphonic acids, sulphonamides and Sulpha drugs: sulphaguanidine, sulphadiazine (sulphapyridine), sulphamethoxazole, sulphacetamide.

Synthetic Polymers : Addition or chain-growth polymerization. Free radical and ionic polymerization. Ziegler-Natta Catalyst Condensation or step-growth polymerization. Polyesters, polyacides, phenol-formaldehyde resins, urea-formaldehyde resins, epoxy resins and polyurethanes. Natural and synthetic rubber.

Synthetic Dyes : Colour and constitution (electronic concept). Classification of dyes. Chemistry and synthesis of methyl orange, congo red, malachite green, crystal violet, phenolphthalein, fluorescein, alizarin and indigo.

### Course Paper III: Physical Chemistry (2 Hrs. or 3 periods/week)

#### UNIT-I

Elementary quantum Mechanics:

Black-body radiation, Planck's radiation law, photoelectric effect, heat capacity of solids, Bohr's model of hydrogen atom (no derivation) and its defects, Compton effect.

De Broglie hypothesis, the Heisenberg's uncertainty principle, Sinusoidal wave equation, Hamiltonian operator, Schrodinger wave equation and its importance, physical interpretation of

R. J. Tar  
Dy. Registrar

Academics  
University of Jammu, Jammu  
JAMMU

the wave function, postulates of quantum mechanics, particle in a one dimensional box.

Schrodinger wave equation for H-atom, separation into three equations (without derivation), quantum numbers and their importance, hydrogen like wave functions, radial wave functions, angular wave functions.

### UNIT-II

Molecular orbital theory:

Basic ideas-criteria for forming M.O. from A.O. construction of M.O's by LCAO- $H_2^+$  ion calculation of energy level from wave functions, physical picture of bonding and antibonding wave functions, concept of  $\sigma$ ,  $\sigma^*$ ,  $\pi$ ,  $\pi^*$  orbitals and their characteristics. Hybrid orbitals -  $sp$ ,  $sp^2$ ,  $sp^3$ , calculation of coefficients of A.O.'s used in these hybrid orbitals.

Introduction to valence bond model of  $H_2$ , comparison of M.O. and V.B. models.

### UNIT-III

Spectroscopy

Introduction: Electromagnetic radiation, spectrum, basic features of different spectrometers, statement of the Born-Oppenheimer approximation, degrees of freedom.

Rotational Spectrum: Diatomic molecules, Energy levels of a rigid rotator (semi-classical principles), selection rules, spectral intensity, using population distribution (Maxwell-Boltzmann distribution) determination of bond length, qualitative description of non-rigid rotator, isotope effect.

Vibrational Spectrum: Infrared spectrum: Energy levels of simple harmonic oscillator, selection rules, pure vibrational spectrum, intensity, determination of force constant and qualitative relation of force constant and bond energies, effect of anharmonic motion and isotope on the spectrum, idea of vibrational frequencies of different functional groups.

Raman Spectrum: Basic principles and applications, concept of polarizability, pure rotational and pure vibrational Raman Spectra of diatomic molecules, selection rules.

Electronic Spectrum: Concept of Potential Energy curves for bonding and antibonding molecular orbitals, qualitative description of selection rules and Frank Condon principle.

Qualitative description of  $\sigma$ ,  $\pi$  and  $n$  M.O. their energy levels and the respective transitions.

### UNIT-IV

Photochemistry

Interaction of radiation with matter, difference between thermal and photochemical processes.

Laws of photochemistry: Goussin-Draper law, Stark-Einstein law, Jablonski diagram depicting various processes occurring in the excited state, qualitative description of fluorescence, phosphorescence, non-radiative processes (internal conversion, intersystem crossing), quantum yield, photochemical reactions-energy transfer processes (simple examples).

Physical Properties and Molecular Structure

Optical activity, polymerization - (Clausius-Mossotti equation), orientation of dipoles in an electric field, dipole moment, induced dipole moment, measurement of dipole moment temperature method and refractivity method, dipole moment and structure of molecules, magnetic properties-paramagnetism, diamagnetism and ferromagnetic.

Rj Tas  
Dr. R. S. SINGH (Acad.)  
University of Rajasthan  
Jaipur

## UNIT-V

### Solutions, Dilute Solutions and Colligative Properties:

Ideal and non-ideal solutions, methods of expressing concentrations of solutions, activity and activity coefficient.

Dilute solution, colligative properties, Raoult's law, relative lowering of vapor pressure, molecular weight determination. Osmosis, law of osmotic pressure and its measurement, determination of molecular weight from osmotic pressure. Elevation of boiling point and depression in freezing point, Thermodynamic derivation of relation between molecular weight and elevation of boiling point and depression in freezing point. Experimental methods for determining various colligative properties. Abnormal molar mass, degree of dissociation and association of solutes.

### Practical: CH-304: Laboratory Course - III

(6 hrs/week)

#### INORGANIC CHEMISTRY

##### Synthesis and Analysis of:

- Potassium trioxalatofermate (III),  $K_3[Fe(C_2O_4)_3]$
- Poly(ethyleneglycol)oximate nickel (II) complex,  $[Ni(HEMG)_2]$
- Cuprous copper (II) sulphate,  $[Cu(NH_3)_4]SO_4$
- Potassium bis(oxalato)chromate (III) dihydrate,  $K[ox-Cr(ox)_2(C_2O_4)_2] \cdot 2H_2O$

##### Instrumentation

##### Calorimetry

- Job's
  - Mole-ratio method
- Adulteration-Food stuffs  
Effluent analysis water analysis

##### Solvent Extraction

Separation and estimation of Mg (II) and Fe (II)

##### Ion Exchange Method

Separation and estimation of Mg (II) and Fe (II)

#### ORGANIC CHEMISTRY

##### Laboratory Techniques

##### Steam Distillation

- $CaCl_2$  anhydrous from its suspension in water
- Clove oil from Clove
- Separation of o- and p-nitrophenols

##### Column Chromatography

- Separation of chlorophyll a and methylene blue
- Separation of pigments from spinach leaves
- Resolution of racemic mixture of (+) mandelic acid

##### Qualitative Analysis

Analysis of an organic mixture containing two solid components using water,  $NaHCO_3$ , for separation and preparation of suitable derivatives.

##### Synthesis of Organic Compounds

- Acetylation of salicylic acid, aniline, glucose and hydroquinone,

Raj / Jas  
Dy. Registrar

Principal, J. J. College of Education, J. J. College of Education, J. J. College of Education

(Date)

45

**Benzoylation of aniline and phenol**

- (b) Aliphatic electrophilic substitution
  - Preparation of iodoform from ethanol and acetone
- (c) Aromatic electrophilic substitution
  - Nitration
  - Preparation of m-dinitrobenzene
  - Preparation of p-nitroacetanilide
  - Halogenation
    - Preparation of p-bromoacetanilide
    - Preparation of 2,4,6-tribromophenol
- (d) Coupling reactions / coupling
  - Preparation of methyl orange and methyl red
- (e) Oxidation
  - Preparation of benzoic acid from toluene
- (f) Reduction
  - Preparation of aniline from nitrobenzene
  - Preparation of m-aminaniline from m-dinitrobenzene

**Stereochemical Study of Organic Compounds via Models**

- (R and S) configuration of optical isomers.
- E, Z configuration of geometrical isomers.
- Conformational analysis of cyclohexanes and substituted cyclohexanes.

**PHYSICAL CHEMISTRY**

**Electrochemistry**

- (a) To determine the strength of the given acid conductometrically using standard alkali solution.
- (b) To determine the solubility and solubility product of a sparingly soluble electrolyte conductometrically.
- (c) To study the saponification of ethyl acetate conductometrically.
- (d) To determine the ionization constant of a weak acid conductometrically.
- (e) To titrate potentiometrically the given ferrous ammonium sulphate solution using  $KMnO_4/K_2Cr_2O_7$  as titrant and calculate the redox potential of  $Fe^{3+}/Fe^{2+}$  system on the hydrogen scale.

**Refractometry, Polarimetry**

- (1) To verify the law of refraction of mixture (e.g.  $C_2H_5OH$  and water) using Abbe's refractometer.
- (2) To determine the specific rotation of a given optically active compound.

**Molecular Weight Determination**

- (a) Determination of molecular weight of a non-soluble solute by Rast method/Beckmann freezing point method.
- (b) Determination of the apparent degree of dissociation of an electrolyte (e.g. NaCl) in aqueous solution at different concentrations by ebullioscopy.

**Colorimetry**

- (a) To verify Beer-Lambert law  $KMnO_4/K_2Cr_2O_7$  and determined the concentration of the given solution of the substance.

University of Rajasthan

(Instructions to the Examiner)

**CH-304 Chemistry Practical (Pass Course)**

Max. Marks: 50

Duration of Exam: 5 hrs.

Minimum marks: 18

**Inorganic Chemistry**

Synthesis and Analysis of one of the four syntheses given in the syllabus.

OR

Separation and estimation of Mg (II) and Fe (II) by solvent extraction method.

OR

Separation and estimation of Mg (II) and Fe (II) by ion exchange method.

10

**Organic Chemistry**

(1) Synthesis of one of the six organic preparations.

5

(2) Analysis of an organic mixture containing two solid components using water /  $\text{NaHCO}_3$  /  $\text{NaOH}$  and preparation of suitable derivatives.

OR

Column chromatography techniques.

Perform one of the three column chromatography experiments given in syllabus.

10

**Physical Chemistry**

Performs one of the physical chemistry experiments given in the syllabus.

Duration of examination of practicals:

## Note:

1. There will be 5 questions in each paper. All questions are compulsory. Candidate has to answer all questions in the main answer book only.
2. Q.No. will have 20 very short answer type Questions not more than 20 words of half marks each covering entire syllabus.
3. Each paper is divided into four units. There will be one question from each unit. These Q. No. 2 to 5 will have internal choice.

Part I

PLANT MORPHOLOGY AND ANATOMY

(2 hrs. work)

Unit 1

The basic body plan of flowering plants; angular type of growth. Diversity of Plant form in annuals, biennials and perennials; branching patterns; monopodial and sympodial growth; crown architecture; meristematic, simple, complex and vascular tissues; tissue systems.

Unit 2

The Shoot system: The shoot apical meristem and its physiological organization; vascularization of primary shoot in monocotyledons and dicotyledons; cambium and its functions; formation of secondary system; a general account of wood structure growth ring, softwood and hardwood, secondary phloem-structure and function, growth; Asymptotic secondary growth.

Unit 3

The Leaf: organ development, arrangement and diversity in size and shape; Stomata Structure and types, stomatal index, vascularization of leaf-vein structure and venation. Senescence and abscission.

The root system: Root apical meristem; differentiation of primary and secondary tissues and their functions; structural modifications for storage, respiration, reproduction and root-microbe interaction.

Unit 4

Morphology and anatomy of seed (monocotyledons and dicotyledons). Significance of seed-suspended animals; dispersal strategies. Vegetative propagation.

Suggested reading:

Curtis, E. G. 1979. *Floral and Tissue Culture*. Edward Arnold, London.

Curtis, E. G. 1979. *Floral and Tissue Culture: Experiments and interpretation*, part II, volume 1. Edward Arnold, London.

Evans, R. 1977. *Anatomy of Seed Plants*. 2nd edition. John Wiley & Sons, New York.

Fahn, A. 1985. *Plant Anatomy*. Pergamon Press, Oxford.

Hartman, J. H. and Moore, G. E. 1976. *Plant Propagation: Principles and of India*. Pvt. Ltd. New Delhi.

Manseth, J. D. 1988. *Plant Anatomy*. The Horwood Publishing Co. Inc. Menlo Park, California, USA.

Raven, P.H., Evert, R.F. and Eichhorn, S.E. 1986. *Biological Botany*, W.H. Freeman and Co. Worth Publishers, New York.

Thomas, P. 1986. *Plant Tissues*. National Institute of Research in Botany, Cambridge University Press, Cambridge.

Rajiv  
By Registrar (Acad.)  
University of Rajasthan  
JALPUR

Suggested Laboratory Exercises:

1. Study of an commonly occurring dicotyledonous plant to understand the body plan and modular type of growth.
2. Life forms exhibit. by flowering plants (visit to a garden)
3. U.S. of shoot tips to study the organization, maintenance and origin of leaf primordia
4. Monopodial and sympodial types of branching in monocots & dicots
5. Anatomy of primary and secondary growth in monocots and dicots using hand cut sections of sunflower, maize, cucurbit stem and roots.
6. Anamalous secondary growth in stem *Schubera*, *Begonia*, *Bougainvillea*, *Bauhinia*, *Mimulus*, *Lepidodermis*, *Ulex*
7. Study of diversity w.r.t. shape and size, Internal structure of leaf Dorsiventral and isobilateral leaves; study of annual rings.
8. Examination of seed (monocot and dicot) Structure seed viability test.
9. Special study of modifications of plant parts like Vegetative reproduction

General (Cereals, pulses, musli). Fibres Cotton and jute. Wood General account of sources of firewood timber and bamboos; Rubber Fibrobotany: a general account.

#### Practical Experiments:

1. Study frequency and density, abundance of plant species of campus vegetation by quadrat method
2. Variation in soil moisture retention in depth
3. To estimate bulk density of grassland and woodland soil
4. To estimate the porosity of grassland and woodland soil sample.
5. To determine moisture content of grassland and woodland soil.
6. To measure dissolved oxygen content in polluted and unpolluted water samples.
7. To determine temperature of different water bodies
8. Water holding capacity of the soil
9. Find out pH of soil sample by universal indicator method.
10. Find out pH of water sample by pH meter
11. Find out transparency of a waterbody by Secchi disk
12. Study morphology (external and internal) of hydrophytes (*Hydrilla* stem, *Typha* leaf and *Nymphaea*/*Eichhornia* petioles) and xerophytes (*Calotropis*, *Capparis* and *Cinnamomum* stem, *Mesquit* leaf) with special reference to their adaptations
13. Study following specimens with special reference to:
  1. Botany of the economically important parts
  2. Part of the plant involved
  3. Specimens of cereals, pulses, various broad leaf (tea & coffee) beans, sugar, medicinal plants, groundnut.
14. Study *Starch* grain in potato and give histochemical test Cellulose, lignin, starch, fibre, groundnut, ramon
15. Submit 2 specimens of locally important medicinal plants.

Paper-III

Angiosperm- Taxonomy and Embryology  
(2 hrs each)

Unit-1

For extension of Taxonomy, Limits of classification, Concept of genus and species, Botanical Nomenclature, International Code of Horticultural Nomenclature

Relevant literature: Curtis, Gardens, Herbaria, Monographs, Icones, Library.

Types of systems of Classification: Bentham and Hooker's, Engler and Prantl's system.

Diversity of flowering plants illustrated by members and economic importance of the following families: Ranunculaceae, Brassicaceae, Papaveraceae, Malvaceae, Fabaceae, Chrysothamnaceae and Apocynaceae

Unit-2

Rubiaceae, Asteraceae, Apocynaceae, Asclepiadaceae, Convolvulaceae, Solanaceae, Araliaceae, Fabaceae, Chenopodiaceae, Leguminosae, Urticaceae, Arceuthobium and Poaceae.

Unit-3

Changes in the flower parts-development and variations. Structure of anther, microsporogenesis, Tapetal types and function, development of male gametophyte, structure of pollen grains

Types of ovule, Megasporogenesis, development of female gametophyte (Embryosac), Placentation, Pollination types, Fertilization, double fertilization, significance of double fertilization

Unit-4

Development of dicot and monocot embryo, classification of embryo types of Embryo, Cotyledons, Scutellum, Epiblastula, embryonic axis, Post-embryony, Induced post-embryony, Paucicotyledons, Adventitious

Raj / Jar  
Dy. Registrar  
University of Jammu  
Jammu

(ii) The following genera are suitable for study of laminae

1. Ranunculaceae - *Ranunculus*, *Thalictrum*
  2. Euphorbiaceae - *Castor*, *Alchornea* and *Adiantum*
  3. *Alchornea*
  4. *Alchornea*
  5. *Alchornea*
  6. *Alchornea*
  7. *Alchornea*
  8. *Alchornea*
  9. *Alchornea*
- (iii) *Alchornea*

1. *Alchornea*

2. *Alchornea*

13. Visit to a local Botanical Garden / Herbarium / National Park / Study of local floral diversity (candidates are expected to submit a detailed report of such visit)

1. To study the wall layers and pollen sac with pollen grains.
2. To study the various types of ovule with the diagrams.
3. To study the various types of placentation.
4. To study the structure of pollen grain and the process of growth of pollen tube.
5. To study the various stages of embryo development.

NOTE:

1. There will be two parts of every theory question paper with total duration of 3 hours. First part of question paper will comprise question No. 1 containing 9 (Paper I & II) or 10 (Paper III) very short answer (Maximum 25 words) type questions, each of 1 mark. This part is compulsory to attempt. Questions should be evenly distributed covering entire syllabus. Second part of question paper will be of long answer type questions having three sections. There will be total 9 questions (Q. No. 2 to 10) in this part, i.e., three from each unit/section out of which candidates will be required to attempt any 4 question selecting at least one question from each unit/section. Each question will carry 6 marks.
2. The candidate has to answer all questions in the main answer book only.

PAPER - I: Z-301

STRUCTURE AND FUNCTIONS OF CHORDATE TYPES

NOTE:

1. There will be two parts of this theory question paper with total duration of 3 hours. First part of question paper will comprise question No. 1 containing 9 very short answer (Maximum 25 words) type questions, each of 1 mark. This part is compulsory to attempt. Questions should be evenly distributed covering entire syllabus. Second part of question paper will be of long answer type questions having three sections. There will be total 9 questions (Q. No. 2 to 10) in this part i.e. three from each unit/section, out of which candidate will be required to attempt any 4 question selecting at least one question from each unit/section. Each question will carry 6 marks.
2. The candidate has to answer all questions in the main answer book only.

Section - A

Chordates

1. Comparison of habit, external features and anatomy of *Herdmania* and *Branchiostoma* (excluding development).
2. Ascidian tadpole larva and its metamorphosis.
3. Affinities of Hemichordata, Urochordata and Cephalochordata
4. Habit, habitat and salient features of *Percepsora*, Arthropod larva.

Section - B

Structure, organs and Systems: Brain, endoskeleton, Digestive, Circulatory, Respiratory,

Excretory, Nervous & Reproductive

Pisces- Labeo

Amphibian-Frog

Reptile-Varanus

Aves-Pigeon

Mammal-Rat

Section - C

Chordate Adaptations

1. Pisces: Scales and fins, migration and parental care.
2. Amphibia: Parental care.
3. Reptilia: Poisonous and non poisonous snakes, poison apparatus.
4. Aves: Flight adaptations, types of feather, bird migration.
5. Mammals: Adaptive radiation, dentition.

University of Rajasthan  
Jaipur

**PAPER - II: Z-302**  
**ECOLOGY AND ENVIRONMENTAL BIOLOGY**

**NOTE:**

1. There will be two parts of this theory question paper with total duration of 3 hours. First part of question paper will comprise question No. 1 containing 9 very short answer (Maximum 25 words) type questions, each of 1 mark. This part is compulsory to attempt. Questions should be evenly distributed covering entire syllabus. Second part of question paper will be of long answer type questions having three sections. There will be total 9 questions (Q. No. 2 to 10) in this part i.e. three from each unit /section, out of which candidate will be required to attempt any 4 question selection at least one question from each unit/section. Each question will carry 6 marks.
2. The candidate has to answer all questions in the main answer book only.

**Section - A**

**Ecology**

1. Basic concepts in ecology, its meaning and history.
2. Concepts of limiting factors.
3. Ecosystem: Biotic and abiotic factors.
4. Ecosystem: Production, consumption and decomposition in an ecosystem. Concepts of food-chain, food web, trophic structure, ecological pyramids
5. Biogeochemical cycles of  $O_2$ ,  $CO_2$ ,  $H_2O$ , N, P and role of microbes.
6. Ecosystem: Homeostasis, functional aspects, productivity concepts and determination, ecotone, edge effects, niche.
7. Population ecology: Density and methods of its measurement, natality, mortality, age ratio and distribution, pyramids, fluctuations, biotic potential, dispersal, growth forms, population interactions and propagation, brief idea of demography.
8. Community ecology: Characteristics of natural communities, structure, composition, stratification.
9. Ecological succession: Types and patterns, concept of climax, details of xerose and hydrosere successions.
10. Habitat ecology: Brief account of fresh water, marine, terrestrial and estuarine water ecosystems.
11. Major biomes of the world.
12. Ecology and human future: Growth rate role of human kind in modifying natural communities in term of public health and welfare with respect to use of pesticides, conservation and pollution.

*Raj Khat*

Dy. Registrar (Academic-I)  
University of Rajasthan  
Jaipur

**Section - B**

**Environmental Biology-I**

1. Environment and its concepts, global environment, hydrosphere, lithosphere and atmosphere.
2. Natural resources: Present status and future needs.
3. Conservation and management of natural resources: Renewable (forest, wildlife, water) and non renewable (soil, minerals and energy).
4. Environmental pollution I: General outline and various types of pollution of water, air, and soil.
5. Environmental pollution II: Sources and remedies for noise, radiation, industrial chemicals, agrochemicals, insecticides, pesticides and household pollutants.
6. Green House effect, Ozone layer depletion, El-Nino and La Nina effects.
7. Radiation and environment. Types of radiation, fallout effects of radiation nuclear accidents.
8. Basic concepts of bioaccumulation, biomagnifications, biodegradation of pollutants.

**Section - C**

**Environmental Biology -II**

1. Wildlife conservation: Vanishing and threatened animals and plants with special reference in Rajasthan, Wildlife management efforts by Government and non Government organization (including wild life acts).
2. Impact of urbanization: Development and distribution of urban centers, factors, problems and solutions of urbanization, fauna of oriental region.
3. Space ecology: Space ecosystem, space problems and their solutions, colonization.

**PAPER -III: Z-303**

**APPLIED ZOOLOGY, ETHNOLOGY AND BIostatistics**

**NOTE:**

1. There will be two parts of this theory question paper with total duration of 3 hours. First part of question paper will comprise question No. 1 containing 10 very short answer (Maximum 25 words) type questions, each of 1 mark. This part is compulsory to attempt. Questions should be evenly distributed covering entire syllabus. Second part of question paper will be of long answer type questions having three sections. There will be total 9 questions (Q. No. 2 to 10) in this part i.e. three from each unit/section, out of which candidate will be required to attempt any 4 question selecting at least one question from each unit/section. Each question will carry 6 marks.
2. The candidate has to answer all questions in the main answer book only.

*Raj Nar*

Dy. Registrar (Academic-I)  
University of Rajasthan  
Jaipur

### Section – A

#### Applied Zoology

Principles and Practices of the following:

1. Vermiculture.
2. Sericulture (including criculture).
3. Lac culture.
4. Apiculture.
5. Prawn culture.
6. Poultry keeping.

Economic Importance of the following:

1. Protozoa.
2. Corals and coral reefs.
3. Helminths.
4. Arthropods; Insects and their management
5. Mollusca: Outline idea of pearl culture.

### Section – B

#### Ethology

1. Introduction and history of Ethology.
2. Concepts of Ethology : Fixed action pattern, sign stimulus, innate releasing mechanism, action specific energy, motivation imprinting and learning.
3. Pheromones and their role in alarm spreading
4. Societies: Characteristics and advantage with special reference to honey bee & deer.
5. Biological rhythms and biological clocks.
6. Methods of studying animal behavior.

### Section – C

#### Biostatistics

1. Introduction, scope and application of Biostatistics.
2. Understanding the concepts of descriptive and inferential statistics.
3. Frequency distribution.
4. Graphical and tabular presentation of data.
5. Mean, median, mode and their significance.
6. Standard deviation, standard error and their significance.
7. Hypothesis: Null and alternative; Student's t-test.

*Raj / Jas*

Dy. Registrar (Academic-I)  
University of Rajasthan  
Jaipur

**Syllabus: B.Sc.-B.Ed. Part-III (Pass Course)**

**Zoology Practical**

(2019-2020)

Min. Marks: 18

4 Hrs. / Week

Max. Marks: 50

**I. Anatomy:**

Any suitable fish (*Wallago, Labro*): External features, general viscera, afferent and efferent branchial blood vessels, eye muscles and their innervations, brain, cranial nerves and internal ear

**II. Study of the following through Permanent Slide preparations:**

Sulphed muscle fibers; Smooth muscle fibers, scales of edible fish, hair of man, rolled film of any vertebrate.

**III. Study of Microscopic Slides: Whole mounts of oral hood, velum and pharyngeal wall of *Amphioxus*; T. S. of *Amphioxus* through various regions; tadpole larva of *Ascidia*; whole mounts of *Salpa, Doliolum* and *Diphytrea*, V. S. of skin of fish, T. S. body of fish through various regions, V. S. of skin of bird, V. S. mammalian skin, T. S. mammalian liver, kidney, stomach, intestine, bone, spinal cord, lung, duodenum, pancreas, testis and ovary.**

**IV. Study of Museum Specimens: *Ascidia, Clava, Botryllus, Ammocoete Larva, Paracystos, Myxine* or *Diadema*, *Zygaena (Spiyria)*, *Torpedo, Chimera*; *Acipenser, Amia* or *Lepidosteus, Labra, Clarias, Anguilla, Hippocampus, Exocoetus, Belontiis*, any flat-fish, *Pteronotus, Ichthyophis* or any blind-worm, *Proteus, Ambystoma, Axolotl, Siren, Alyce, Hyla, Testudo, Chelone*, and Fresh Water Tortoise, *Sphenodon, Hemitidactylus, Pleurozouma, Draco, Chamaeleon; Eryx, Hylasphid, Naja, Viper, Crocodilus, Alligator, Archaeopteryx*, any Running Bird, *Peromyscus, Mus, Rattus, Sciurus, Sorex, Marmota, Canis, Felis, Mustela, Martes, Mongoose, Bat, Loris, Scaly antenter.***

**V. Osteology: A comparative study of articulated and disarticulated bones of skull, vertebrae, limb bones and girdles of any amphibian, reptile, bird and mammal with the help of models/ charts/ artificial skeleton/bones.**

**VI. Environmental Biology:**

Analysis of Environment:

1. Soil pH
2. Water analysis: pH, alkalinity, acidity, dissolved O<sub>2</sub> and free CO<sub>2</sub>, Salinity (Chloride).
3. Qualitative estimation of zoo-plankton in given sample of water.

*Rajl Jas*

Dy. Registrar (Academic-I)  
University of Rajasthan  
Jaipur

**VII. Ethology:**

1. Study of any stored insect pest (food preference and response to light)
2. Antennal grooming in cockroach.
3. Chemical communication: Ants/earthworm.
4. Visit to a Zoo/ Museum of Natural History /Wild life Sanctuary and/or Study of local faunal biodiversity (Candidates are expected to submit a detailed report of such visit)

**VIII. Biostatistics:**

1. Construction of frequency table, bar diagram, line diagram, histogram, frequency polygon and pie chart.
2. Exercises on mean, median and mode (direct, short-cut and step-deviation methods).
3. Standard deviation and standard error.

**B.Sc.-B.Ed. Part - III****Scheme of Practical Examination and Distribution of Marks**

Time: 4 Hrs.

Min Pass Marks: 18

Max. Marks: 50

		Regular	Ex./N.C. Students
1.	Anatomy	6 (4+2)	7 (5+2)
2.	Permanent Preparation	5	6
3.	Environmental Biology	5	5
4.	Ethology	5	5
5.	Biostatistics	5	6
6.	Identification and comments on Spots (1 to 8)	16	16
7.	Viva Voce	5	5
8.	Class Record	5	-
		50	50

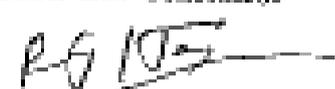

Dy. Registrar (Academic-I)  
University of Rajasthan  
Jaipur

**Notes:**

1. With reference to anatomy and study of museum specimens, candidates must be well versed in the study of various systems with the help of charts/models/CD-ROMs, multimedia computer based simulations including computer assisted learning (CAL) and other softwares.
2. With reference to permanent preparations and microscopic slides, in case of non-availability, the exercise should be substituted with diagrams, photographs, models, charts, etc.
3. Candidates must keep a record of all work done in the practical class and submit the same for inspection at the time of the practical examination.
4. The candidates may be asked to write detailed methodology wherever necessary and separate marks may be allocated for the same.
5. Mounting material for permanent preparations would be as per the syllabus or as available through collection and culture methods.
6. It should be ensured that animals used in the practical exercises are not covered under the wild life act 1972 and amendments made subsequently.

## PHYSICS

### Scheme

Paper I	Exam: 3 hours duration	Min Pass marks: 12	Max. Marks: 33
Paper II	Exam: 3 hours duration	Min Pass marks: 12	Max. Marks: 33
Paper III	Exam: 3 hours duration	Min Pass marks: 12	Max. Marks: 34
Practical	Exam: 4 hours duration	Min Pass marks: 18	Max. Marks: 50

### Paper I: Quantum Mechanics and Spectroscopy

*Work Load: Two hours Lecture per week*

Scheme of Examination: First question will be of nine marks comprising of six short answer type parts each with answer not exceeding half a page. Remaining four questions will be set with one question from each of the unit and will be of six marks each. Second to fifth question will have two parts namely (A) and (B) each carrying three marks. Part (A) of second to fifth question shall be compulsory and Part (B) of these questions will have internal choice.

#### Unit - I: Evolution of quantum physics

- Difficulties of classical mechanics to explain the black-body emission spectrum, specific heat of solids, Planck quantum concept and radiation law, Photo electric effect and its explanation, Compton effect, De-Broglie hypothesis, diffraction and interference experiments of particle (Davisson-Germer experiment).
- Uncertainty principle; position and momentum, angle and angular momentum, energy and time. Application of uncertainty principle: (i) Ground state energy of hydrogen atom, (ii) ground state energy of simple harmonic oscillator, (iii) Natural width of spectral lines, (iv) Non-existence of electron in nucleus.
- Operators: linear operators, product of two operators, commuting and non-commuting operators, simultaneous eigen functions and eigen values, orthogonal wavefunctions, Hermitian operators, their eigenvalues, Hermitian adjoint operators,

eigenvalues and eigenfunctions; expectation values of operators: position, momentum, energy, Ehrenfest theorem and complementarity, Concept of group and phase velocity, wave packet, Gaussian wave packet, bracket notation.

Unit - II : Schrödinger wave equation and its solutions

1. Schrödinger wave equation: general equation of wave propagation, propagation of matter waves, time dependent and time-independent Schrödinger equation, wavefunction representation ( $\psi$ ), physical meaning of  $\psi$ , properties and conditions on  $\psi$ , postulates of wave mechanics, operators, observable and measurements; probability current density.

2. Time independent Schrödinger equation, stationary state solution, one dimensional problem: particle in one dimensional box, eigenfunctions and eigenvalues, discrete energy levels, generalization into three dimension and degeneracy of energy levels, concept of a potential well and barrier, step potential, penetration through rectangular barrier, reflection and transmission coefficients, barriers with special shapes (graphical representation), quantum mechanical tunneling (alpha decay).

Unit - III : Schrödinger equation solutions in special cases

1. Symmetric square well potential, reflection and transmission coefficients, resonant scattering; Bound state problems: particle in one dimensional infinite potential well and finite depth potential well, energy eigenvalues and eigenfunctions, transcendental equation and its solutions; Simple harmonic oscillator, Schrödinger equation for simple harmonic oscillator and its solution, eigenfunction, eigenvalues, zero point energy, quantum and classical probability density, parity, symmetric and antisymmetric wave functions with graphical representation.

2. Schrödinger equation in spherical coordinates, Schrödinger eq. in  $r, \theta, \phi$  for one electron atom in spherical coordinates, separation into radial and angular variables, solution of radial equation and angular equation, qualitative discussion of spherical harmonics, series solution and energy eigenvalues, stationary state wavefunction.

Wave-functions of H-atom for ground and first excited states, average radius of H-atom, Bohr correspondence principle, orbital angular momentum and its quantization, commutation relation, eigenvalues and eigenfunctions.

UNIT - IV: H-atom, Atomic and Molecular spectroscopy

1. Energy level derivation for H-atom, quantum features of hydrogen spectra and Rydberg like spectra, Stern-Gerlach experiment, electron spin spin magnets.

Raj / Jai

The Registrar  
Rajasthan  
University of Rajasthan  
Jaipur

moment, spin-orbit coupling, qualitative explanation of fine structure, Franck-Hertz experiment, Zeeman effect, normal Zeeman splitting, Qualitative understanding about Stark effect

2. Absorption and emission spectroscopy, its block diagram, brief explanation about function of each elements and it's limitations; single beam spectrophotometer.

3. Molecular spectroscopy, concept of rigid rotator, rotational energy levels, rotational spectra, selection rules, intensity of spectral lines, isotopic effect, vibrational energy levels, vibrational spectra, selection rules, isotopic effect, effect of anharmonicity in vibrational spectra, vibrational-rotational spectra of CO and HCl molecules.

#### Reference books

1. Griffiths, Introduction to Quantum Mechanics, 2nd edition.

2. R. Shankar, Principles of Quantum Mechanics, 2nd edition.

3. Arthur Beiser, Perspective of modern Physics, 6th edition.

4. AK Ghatak and S Lokanathan, Quantum Mechanics: Theory and application.

5. HS Mani, GK Mehta, Introduction to modern Physics.

6. C.N. Banwell and E.M. McCash, Fundamental of Molecular Spectroscopy, 4th edition

7. E.E. White, Introduction to atomic physics,

### Paper II: Nuclear and Particle Physics

Mark Load: Two hours Lecture per week

Scheme of Examination: First question will be of nine marks comprising of six short answer type parts each with answer not exceeding half a page. Remaining four questions will be set with one question from each of the unit and will be of six marks each. Second to fifth question will have two parts namely (A) and (B) each carrying three marks. Part (A) of second to fifth question shall be compulsory and Part (B) of these questions will have internal choice.

#### UNIT - 1

Properties of Nucleus : Discovery of Nucleus, Rutherford Scattering, Constituents of the Nucleus, Mass, Charge, Size, Nuclear Density, Charge Distribution, Chadwick's experiment.

Nuclear Angular momentum, Nuclear Magnetic Dipole Moment, Electric Quadrupole Moment, Spin, Isospin, Wave Mechanical Properties: Parity and Statistics, Classification of Nuclei, Mass Defect and Binding Energy, Packing Fraction, Mass Spectrograph.  
Nuclear Forces: Properties of Nuclear Forces, Yukawa Meson Theory, Nuclear Potential.  
Nuclear Models: Segre Chart, Liquid Drop Model, Semi Empirical Mass Formula, Condition of Stability, Fermi Gas Model, Evidence for Nuclear Shell Structure, Nuclear Magic Numbers and Basic Assumptions of the Shell Model.

#### UNIT - 2

Radioactive Decays: Alpha Decay-Basics of  $\alpha$ -Decay Processes, Theory of  $\beta$ -Emission Spectrum, Gamow Factor, Geiger Nital Law, Range of Alpha Particles,  
Beta Decay-Energy Kinematics for  $\beta$ -Decay,  $\beta$ -Decay Spectrum, Positron Emission, Electron Capture, Pauli's neutrino Hypothesis.  
Gamma Decay- Gamma Ray Emission and Kinematics, Internal Conversion  
Applications of Radioactivity  
Nuclear Fission and Fusion: Nuclear Fission, Spontaneous Fission and Potential Barriers, its Explanation by Liquid Drop Model, Chain reaction, Controlled chain reaction, Four Factor Formula, Nuclear Reactors, Classification of Nuclear Reactor, Uncontrolled Chain Reaction, Nuclear Fusion, Energy released in Nuclear Fusion, Fusion in stars.  
Nuclear Reactions: Types of Reactions, Conservation Laws, Kinematics of Reactions, Q-Value, Threshold Energy, Reaction Rate, Reaction Cross-Section.

#### UNIT - 3

Interaction of Nuclear Radiation with Matter: Energy Loss by Heavy Charged Particles in Matter, Interaction of Electrons with Matter, Range of Charged Particle, Bremsstrahlung, Compton Effect, Photo Effect, Gamma Ray Interaction with Matter.  
Radiation Detectors: Gas filled detector, Avalanche, Geiger Discharge, Ionization Chamber, Proportional Counter, Geiger Muller Counter, Circuit mode and Pulse Mode Operation of Detector  
Particle Accelerators: Van de-Graff Accelerator (Tandem Accelerator), Linear Accelerator, Cyclotron, Synchrotron, Betatron, Proton Synchrotron

#### UNIT - 4

Elementary Particles: Necessity of high energy to discover elementary constituents, historical introduction to discovery of elementary particles (electron, positron, neutrino).

strange mesons, charm quark, intermediate vector bosons, bottom quark, top quark and  $\Delta$  baryon) Elementary particles and their quantum numbers (charge, spin, parity, isospin, strangeness, etc.), elementary particles included in the standard model.

**Fundamental Interactions :** Four types of fundamental forces. Symmetries and Conservation Laws, Discrete symmetries C, P, and T invariance. Application of symmetry arguments to particle reactions, Parity non-conservation in weak interaction, CP violation.

**Quark Model :** Flavor symmetries, Gellman-Nishijima formula, the eightfold way, Quark model, Octet Diagram for Mesons and Baryons, Concept of Quark model, the November Revolution, Baryon Decuplet, Color Quantum Number and Gluons.

#### Suggested Books:

1. Nuclear and Particle Physics, W. E. Durrham and M. Jones, Addison Wesley Longman Inc.
2. Nuclear and Particle Physics, Brian R. Martin, John Wiley & Sons.
3. Introduction to Nuclear and Particle Physics, Das and Ferbel, World Scientific.
4. Elements of Nuclear Physics, Walter E. Meyerhof, McGraw-Hill Book Company.
5. Introductory Nuclear Physics, Kenneth S. Krane, John Wiley & Sons
6. Introduction to Elementary Particles, David J. Griffiths, John Wiley & Sons.
7. Radiation Detection and Measurement, G.F. Knoll (John Wiley & Sons)
8. Introduction to Nuclear and Particle Physics, V. K. Mittal, R. C. Verma, S. C. Gupta, PHI
9. Concepts of Modern Physics, A. Beiser, McGraw-Hill Book Company.

### Paper III: Solid State Physics

*Two hours Lecture per week*

**Scheme of Examination:** First question will be of ten marks comprising of five short answer type parts each with answer not exceeding half a page. Remaining four questions will be set with one question from each of the unit and will be of six marks each. Second to fifth question will have two parts namely (A) and (B) each carrying three marks. Part (A) of second to fifth question shall be compulsory and Part (B) of these questions will have internal choice.

## Unit I

### Bonding in Solids and Crystal structure:

Force between atoms, Ionic bonds, Covalent and metallic bonds, Vander waal's and Hydrogen bonding, Periodicity in Ionices, Basis, lattice point and space lattice, Translation vectors, Unit and primitive cell, Crystal systems, Packing fractions for Simple Cubic (SC), Body Centered Cubic (BCC), Face Centered Cubic (FCC) and Hexagonal lattice structures, Bravais lattice structures.

### Crystallography and Diffraction:

Direction, planes and miller indices in a crystal lattice, Reciprocal lattice and its significance, Conversion of SC and FCC structures in reciprocal lattice frame, Concept of crystalline, polycrystalline and amorphous materials, X-ray diffraction by solids: Laue and Bragg's equation, Study of crystals by X-rays: FWHM, Scherrer formula and Lattice Constants (for simple cubic structure), Electron and Neutron diffraction (qualitative).

## Unit II

### Band theory of solids:

Formation of bands, Periodic potential and Bloch Theorem, Number of states in the bands, Kronig-Penney model, Brillouin zones, Crystal momentum and physical origin of effective mass, Negative Effective Mass and Holes, Energy dispersion relations: weak and tight binding.

### Semiconductors:

Energy Band Structures in Insulators, Conductors, Semiconductors, Concept of Direct and Indirect band gap in semiconductors, Generation and recombination of charge carriers, Mobility of charge carriers, Hall Effect in semiconductors, Hall coefficient, Mobility, Charge carrier concentration, Conductivity and Hall angle.

## Unit III

### Thermal properties of Materials:

Elastic waves, Phonon, Phonon dispersion relations in monoatomic and diatomic linear lattice, Lattice heat capacity, Classical theory of specific heat, Dulong-Petit's law, Einstein and Debye's theory of specific heat of solids and limitations of these models, concept of Thermoelectric Power

72

Raj / Jan

Dy. Registrar

University of Rajasthan  
Jaipur

### Electrical properties of Materials:

Free-Lorentz theory, Sommerfeld's Model, Thermal conductivity, Electrical conductivity, Wiedemann-Franz relation, Thermionic Emission, Escape of electrons from metals, Hall Effect in Metals, Density of states.

### Unit IV

#### Magnetic properties of Materials:

Classification of Magnetic Materials. Origin of Atomic Magnetism, Classical Langevin Theory of  $\chi_{dia}$  and Paramagnetic Domains. Quantum theory of Paramagnetism. Curie's law, Weiss's Theory of Ferromagnetism. Concept of Domain Wall, Magnetostriction, Heisenberg's Exchange Interaction, Relation between Exchange Integral and Weiss Constant.

#### Superconductivity:

Experimental features of superconductivity: Critical Temperature, Critical magnetic field, Meissner effect. Type I and type II Superconductors, London's Equation and Penetration Depth, Isotope effect. Idea of BCS theory (No derivation); Cooper Pair and Coherence length, Josephson Effect (No derivation)

#### Reference books

1. Introduction to Solid State Physics--- Charles Kittel (Wiley Publication)
2. Elementary Solid state Physics---M. Ali Omar (Pearson Education)
3. Elements of X-ray diffraction---B. D. Cullity (Prentice Hall)

(Academic)  
University of Rajasthan  
JAIPUR

Teaching Mtr. Marks	Practicals 4 hrs/week Duration 3 hrs.	Min. Pass Marks 13
------------------------	--	-----------------------

Total number of experiments to be performed by the students during the session should be 16 selecting any 8 from each section.

**Section-A**

1. Determination of Planck's constant by photo cell (retarding potential method using optical filters, preferably five wave length).
2. Determination of Planck's constant using solar cell.
3. Determination of Stefan's constant (Black body method)
4. Study of the temperature dependence of resistance of a semi-conductor (four probe method).
5. Study of diffraction spectra with the help of grating and spectrometer and ordinary bulb-light.
6. Study of characteristics of a GM counter and verification of inverse square law for the source strength of a radioactive source.
7. Study of  $\beta$ -absorption in Al-foil using GM Counter.
8. To find the magnetic susceptibility of a paramagnetic solution using Quinck's method. Also find the ionic molecular susceptibility of the ion and magnetic moment of the ion in terms of Bohr magneton.
9. Determination of coefficient of rigidity as a function of temperature using torsional oscillator (resonance method).
10. Study of polarisation by reflection from a glass plate with the help of Nicol's prism and photo-cell and verification of Brewster law and law of Malus.
11.  $\mu_m$  measurement by helical method.
12. Measurements of magnetic field using ballistic galvanometer and search coil. Study of variation of magnetic field of an electromagnet with current.
13. Measurement of electric charge by Millikan's oil drop method.

**Section-B**

1. Study of a R-C transmission line at 50 Hz
2. Study of a L-C transmission line
  - (i) at fixed frequency.
  - (ii) at variable frequency.
3. Study of resonance in an LCR circuit (using air core inductance and damping by metal plate)

  
 Dy. Registrar  
 (Academic)  
 University of Rajasthan  
 JAIPUR

*University of Rajasthan*

- (i) at fixed frequency by varying C, and
- (ii) by varying frequency.
4. Study of the characteristics of junction diode & Zener diode.
5. Study of
  - (i) Recovery time of junction diode and point contact diode.
  - (ii) Recovery time as a function of frequency of operation and switching current.
6. To design Zener regulated power supply and study the regulation with various loads.
7. To study the characteristics of a field effect transistor (FET) and design/study amplifier of finite gain (10).
8. To study the frequency response of a transistor amplifier and obtain the input and output impedances of the amplifier.
9. To design and study of an R-C phase shift oscillator and measure output impedance (frequency response with change of component of R and C).
10. To study a voltage multiplier circuit to generate high voltage D.C. from A.C.
11. Using discrete components, study OR, AND, NOT logic gates, compare with TTL integrated circuits (ICs).
12. Application of operational amplifier (OP-AMP) as : Minimum two of the following exercises-(a) Buffer (for accurate voltage measurement) (b) inverting amplifier (c) Non inverting amplifier (d) Summing amplifier.

**MATHEMATICS****B.Sc.-B.Ed. Part III – 2020****Teaching : 3 Hours per Week per Theory Paper.****Examination Scheme :**

	Bin. Class Marks		Max. Marks
	Science – 54		150
	Arts – 72		200
		Duration	Max. Marks
Paper – I	Algebra	3 hrs.	40 (Science) 53 (Arts)
Paper – II	Complex Analysis	3 hrs.	40 (Science) 53 (Arts)
Paper – III	Mechanics	3 hrs.	40 (Science) 54 (Arts)
Practical		2 hrs.	30 (Science) 40 (Arts)

**Note:**

1. Common paper will be set for both the Faculties of Social Science and Science. However, the marks obtained by the candidate in the case of Faculty of Social Science will be converted according to the ratio of the maximum marks of the papers in the two Faculties.
2. Each candidate is required to appear in the Practical examination to be conducted by internal and external examiners. External examiner will be appointed by the University and Internal examiner will be appointed by the Principal in consultation with Local Head (Head, Department of Mathematics in the college).
3. An Internal/external examiner can conduct Practical Examination of not more than 100 (Hundred) Candidates (20 Candidates in one batch).
4. Each candidate has to pass in Theory and Practical examinations separately.

## Paper -I : Algebra

Teaching : 3 Hours per Week

Duration of Examination : 3 Hours

Max. Marks:

40 (Science)

50 (Arts)

Note: This paper is divided into FIVE Units. TWO questions will be set from each Unit. Candidates are required to attempt FIVE questions in all taking ONE Question from each Unit. All questions carry equal marks.

Unit 1: Definition and simple properties of Groups and Subgroups. Permutation group, Cyclic group. Cosets, Lagrange's theorem on the order of subgroups of a finite order group.

Unit 2: Morphism of groups, Cayley's theorem. Normal subgroups and Quotient groups. Fundamental theorems of Isomorphism.

Unit 3: Definition and simple properties of Rings and Subrings. Morphism of rings. Embedding of a ring, Integral domain and field. Characteristics of a Ring and Field.

Unit 4: Ideals and Quotient Ring. Maximal ideal and Prime ideal. Principal Ideal domain. Field of quotients of an integral domain. Prime fields. Definition, Examples and Simple properties of Vector spaces and Subspaces.

Unit 5: Linear combination, Linear dependence and Linear independence of vectors. Basis and Dimension. Generation of subspaces. Sum of subspaces. Direct sum and Complement of subspaces. Quotient space and its dimension.

5. Kenneth Hoffman, Ray Alden Kunze, Linear Algebra 2nd Ed., Prentice-Hall Of India Pvt Limited, 1971.

## Paper – II: Complex Analysis

Teaching : 3 Hours per Week

Duration of Examination : 3 Hours

Max. Marks: 40 (Science)

53 (Arts)

Note: This paper is divided into FIVE Units. TWO questions will be set from each Unit. Candidates are required to attempt FIVE questions in all taking ONE question from each Unit. All questions carry equal marks.

**Unit 1:** Complex plane. Connected and Compact sets. Curves and Regions in complex plane. Jordan curve Theorem (statement only). Extended complex plane. Stereographic projection. Complex valued function – Limits, Continuity and Differentiability. Analytic functions, Cauchy Riemann equations (Cartesian and polar form). Harmonic functions, Construction of an analytic function.

**Unit 2:** Complex integration, Complex line integrals, Cauchy integral theorem, Indefinite integral, Fundamental theorem of integral calculus for complex functions. Cauchy integral formula, Analyticity of the derivative of an analytic function, Morera's theorem, Poisson integral formula, Liouville's theorem.

**Unit 3:** Taylor's theorem. Laurent's theorem. Maximum modulus theorem. Power series – Absolute convergence, Abel's theorem, Cauchy-Hadamard theorem, Circle and Radius of convergence, Analyticity of the sum function of a power series.

**Unit 4:** Singularities of an analytic function, Branch point, Meromorphic and Entire functions, Riemann's theorem, Casorati-Weierstrass theorem. Residue at a singularity, Cauchy's residue theorem. Argument principle. Rouché's theorem. Fundamental theorem of Algebra.

**Unit 5:** Conformal mapping. Bilinear Transformation and its properties. Elementary mappings:  $w(z) = \frac{1}{z}$ ,  $w(z) = \frac{1}{z} + i$ ,  $z^2$ ,  $e^z$ ,  $\sin z$ ,  $\cos z$  and  $\log z$ .

Evaluation of a real definite integral by contour integration.

Analytic continuation. Power series method of analytic continuation.

2. Joseph Bak and Donald J. Newman, Complex analysis (2nd Edition), Undergraduate Texts in Mathematics, Springer-Verlag New York, Inc., New York, 1997.

### Paper – III: Mechanics

Teaching : 3 Hours per Week

Duration of Examination : 3 Hours

Max. Marks:

40 (Science)

54 (Arts)

Note: This paper is divided into FIVE Units. TWO questions will be set from each Unit. Candidates are required to attempt FIVE questions in all taking ONE question from each Unit. All questions carry equal marks.

Unit 1: Velocity and acceleration – along radial and transverse directions, along tangential and normal directions, S.H.M., Hooke's law, motion along horizontal and vertical elastic strings.

Unit 2: Motion in resisting medium– Resistance varies as velocity and square of velocity. Work and Energy. Motion on a smooth curve in a vertical plane. Motion on the inside and outside of a smooth vertical circle. Projectile

Unit 3: Central orbits – p-r equations, Apses. Time in an orbit. Kepler's law of planetary motion. Moment of inertia – M.I. of rods, Circular rings, Circular disks, Solid and Hollow spheres, Rectangular lamina, Ellipse and Triangle. Theorem of parallel axis. Product of inertia.

Unit 4: Equilibrium of coplanar force, moments and friction.

Unit-5: Virtual work and Catenary.

**Practical**

**Teaching: 2 hours per week per batch not more than 20 students.**

**Examination:**

**Duration: 2 Hours**

**Scheme**

	Science	Arts
Max.Marks	30	40
Min. Pass Marks	11	15

**Distribution of Marks:**

**Two Practicals one from each group**

10 Marks each	20 Marks	(13 Marks each)	26
Practical Record	05 Marks		07
Viva-voce	05 Marks		07
Total Marks	30 Marks		40

The paper will contain TWO practicals. The candidates are required to attempt both practicals.

**Practicals with Computer Programming in C Language.**

**Group A:**

1. Solution of algebraic and transcendental equations by Bisection method, Regula-falsi method and Newton-Raphson method.
2. Solution of initial value problems by Euler's method and Runge-Kutta(third and fourth order) method

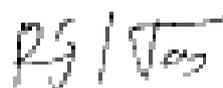

**Group B:**

1. Matrix operations: addition, subtraction, multiplication, Rank of a matrix, Inverse of a matrix.
2. Solution of linear algebraic equations by Gauss elimination method, Matrix method, Gauss Jordan method.

**Notes:**

1. Each Candidate (Regular/non-Collegiate) has to prepare his/her practical record.
2. Each Candidate has to pass in Practical and Theory examinations separately.
